

“The Ones Who Walk Away From Omelas”

by Ursula K LeGuin - from *The Wind's Twelve Quarters*

With a clamor of bells that set the swallows soaring, the Festival of Summer came to the city Omelas, bright-towered by the sea. The ringing of the boats in harbor sparkled with flags. In the streets between houses with red roofs and painted walls, between old moss-grown gardens and under avenues of trees, past great parks and public buildings, processions moved.

Some were decorous: old people in long stiff robes of mauve and gray, grave master workmen, quiet, merry women carrying their babies and chatting as they walked. In other streets the music beat faster, a shimmering of gong and tambourine, and the people went dancing, the procession was a dance. Children dodged in and out, their high calls rising like the swallows' crossing flights over the music and the singing. All the processions wound towards the north side of the city, where on the great water-meadow called the Green Fields boys and girls, naked in the bright air, with mud-stained feet and ankles and long, lithe arms, exercised their restive horses before the race. The horses wore no gear at all but a halter without bit. Their manes were braided with streamers of silver, gold, and green. They flared their nostrils and pranced and boasted to one another; they were vastly excited, the horse being the only animal who has adopted our ceremonies as his own. Far off to the north and west the mountains stood up half encircling Omelas on her bay. The air of morning was so clear that the snow still crowning the Eighteen Peaks burned with white-gold fire across the miles of sunlit air, under the dark blue of the sky. There was just enough wind to make the banners that marked the racecourse snap and flutter now and then. In the silence of the broad green meadows one could hear the music winding throughout the city streets, farther and nearer and ever approaching, a cheerful faint sweetness of the air from time to time trembled and gathered together and broke out into the great joyous clanging of the bells.

Joyous! How is one to tell about joy? How describe the citizens of Omelas?

They were not simple folk, you see, though they were happy. But we do not say the words of cheer much any more. All smiles have become archaic. Given a description such as this one tends to make certain assumptions. Given a description such as this one tends to look next for the King, mounted on a splendid stallion and surrounded by his noble knights, or perhaps in a golden litter borne by great-muscled slaves. But there was no king. They did not use swords, or keep slaves. They were not barbarians, I do not know the rules and laws of their society, but I suspect that they were singularly few. As they did without monarchy and slavery, so they also got on without the stock exchange, the advertisement, the secret police, and the bomb. Yet I repeat that these were not simple folk, not dulcet shepherds, noble savages, bland utopians. There were not less complex than us.

The trouble is that we have a bad habit, encouraged by pedants and sophisticates, of considering happiness as something rather stupid. Only pain is intellectual, only evil interesting. This is the treason of the artist: a refusal to admit the banality of evil and the terrible boredom of

pain. If you can't lick 'em, join 'em. If it hurts, repeat it. But to praise despair is to condemn delight, to embrace violence is to lose hold of everything else. We have almost lost hold; we can no longer describe happy man, nor make any celebration of joy. How can I tell you about the people of Omelas? They were not naive and happy children--though their children were, in fact, happy. They were mature, intelligent, passionate adults whose lives were not wretched. O miracle! But I wish I could describe it better. I wish I could convince you. Omelas sounds in my words like a city in a fairy tale, long ago and far away, once upon a time. Perhaps it would be best if you imagined it as your own fancy bids, assuming it will rise to the occasion, for certainly I cannot suit you all. For instance, how about technology? I think that there would be no cars or helicopters in and above the streets; this follows from the fact that the people of Omelas are happy people. Happiness is based on a just discrimination of what is necessary, what is neither necessary nor destructive, and what is destructive. In the middle category, however--that of the unnecessary but undestructive, that of comfort, luxury, exuberance, etc.--they could perfectly well have central heating, subway trains, washing machines, and all kinds of marvelous devices not yet invented here, floating light-sources, fuelless power, a cure for the common cold. Or they could have none of that: it doesn't matter. As you like it. I incline to think that people from towns up and down the coast have been coming to Omelas during the last days before the Festival on very fast little trains and double-decked trams, and that the train station of Omelas is actually the handsomest building in town, though plainer than the magnificent Farmers' Market. But even granted trains, I fear that Omelas so far strikes some of you as goody-goody. Smiles, bells, parades, horses, bleh. If so, please add an orgy. If an orgy would help, don't hesitate. Let us not, however, have temples from which issue beautiful nude priests and priestesses already half in ecstasy and ready to copulate with any man or woman, lover or stranger, who desires union with the deep godhead of the blood, although that was my first idea. But really it would be better not to have any temples in Omelas--at least, not manned temples. Religion yes, clergy no. Surely the beautiful nudes can just wander about, offering themselves like divine souffles to the hunger of the needy and the rapture of the flesh. Let them join the processions. Let tambourines be struck above the copulations, and the gory of desire be proclaimed upon the gongs, and (a not unimportant point) let the offspring of these delightful rituals be beloved and looked after by all. One thing I know there is none of in Omelas is guilt. But what else should there be? I thought at first there were no drugs, but that is puritanical. For those who like it, the faint insistent sweetness of *drooz* may perfume the ways of the city, *drooz* which first brings a great lightness and brilliance to the mind and limbs, and then after some hours a dreamy languor, and wonderful visions at last of the very arcane and inmost secrets of the Universe, as well as exciting the pleasure of sex beyond all belief; and it is not habit-forming. For more modest tastes I think there ought to be beer. What else, what else belongs in the joyous city? The sense of victory, surely, the celebration of courage. But as we did without clergy, let us do without soldiers. The joy built upon successful slaughter is not the right kind of joy; it will not do; it is fearful and it is trivial. A boundless and generous contentment, a magnanimous triumph felt not against some outer enemy but in communion with the finest and fairest in the souls of all men everywhere and the splendor of the world's summer: This is what swells the hearts of the people of Omelas, and the victory they celebrate is that of life. I don't think many of them need to take *drooz*.

Most of the processions have reached the Green Fields by now. A marvelous smell of cooking goes forth from the red and blue tents of the provisioners. The faces of small children are amiably sticky; in the benign gray beard of a man a couple of crumbs of rich pastry are entangled. The youths and girls have mounted their horses and are beginning to group around the starting line of the course. An old woman, small, fat, and laughing, is passing out flowers from a basket, and tall young men wear her flowers in their shining hair. A child of nine or ten sits at the edge of the crowd alone, playing on a wooden flute.

People pause to listen, and they smile, but they do not speak to him, for he never ceases playing and never sees them, his dark eyes wholly rapt in the sweet, thing magic of the tune.

He finishes, and slowly lowers his hands holding the wooden flute.

As if that little private silence were the signal, all at once a trumpet sounds from the pavilion near the starting line: imperious, melancholy, piercing. The horses rear on their slender legs, and some of them neigh in answer. Sober-faced, the young riders stroke the horses' necks and soothe them, whispering. "Quiet, quiet, there my beauty, my hope..." They begin to form in rank along the starting line. The crowds along the racecourse are like a field of grass and flowers in the wind. The Festival of Summer has begun.

Do you believe? Do you accept the festival, the city, the joy? No? Then let me describe one more thing.

In a basement under one of the beautiful public buildings of Omelas, or perhaps in the cellar of one of its spacious private homes, there is a room. It has one locked door, and no window. A little light seeps in dustily between cracks in the boards, secondhand from a cobwebbed window somewhere across the cellar. In one corner of the little room a couple of mops, with stiff, clotted, foul-smelling heads, stand near a rusty bucket. The floor is dirt, a little damp to the touch, as cellar dirt usually is.

The room is about three paces long and two wide: a mere broom closet or disused tool room. In the room, a child is sitting. It could be a boy or a girl. It looks about six, but actually is nearly ten. It is feeble-minded. Perhaps it was born defective, or perhaps it has become imbecile through fear, malnutrition, and neglect. It picks its nose and occasionally fumbles vaguely with its toes or genitals, as it sits hunched in the corner farthest from the bucket and the two mops. It is afraid of the mops. It finds them horrible. It shuts its eyes, but it knows the mops are still standing there; and the door is locked; and nobody will come. The door is always locked; and nobody ever comes, except that sometimes--the child has no understanding of time or interval--sometimes the door rattles terribly and opens, and a person, or several people, are there. One of them may come in and kick the child to make it stand up. The others never come close, but peer in at it with frightened, disgusted eyes. The food bowl and the water jug are hastily filled, the door is locked; the eyes disappear. The people at the door never say anything, but the child, who has not always lived in the tool room, and can remember sunlight and its mother's voice, sometimes speaks. "I will be good, " it says. "Please let me out. I will be good!" They never answer. The

child used to scream for help at night, and cry a good deal, but now it only makes a kind of whining, "eh-haa, eh-haa," and it speaks less and less often. It is so thin there are no calves to its legs; its belly protrudes; it lives on a half-bowl of corn meal and grease a day. It is naked. Its buttocks and thighs are a mass of festered sores, as it sits in its own excrement continually.

They all know it is there, all the people of Omelas. Some of them have come to see it, others are content merely to know it is there. They all know that it has to be there. Some of them understand why, and some do not, but they all understand that their happiness, the beauty of their city, the tenderness of their friendships, the health of their children, the wisdom of their scholars, the skill of their makers, even the abundance of their harvest and the kindly weathers of their skies, depend wholly on this child's abominable misery.

This is usually explained to children when they are between eight and twelve, whenever they seem capable of understanding; and most of those who come to see the child are young people, though often enough an adult comes, or comes back, to see the child. No matter how well the matter has been explained to them, these young spectators are always shocked and sickened at the sight. They feel disgust, which they had thought themselves superior to. They feel anger, outrage, impotence, despite all the explanations. They would like to do something for the child. But there is nothing they can do. If the child were brought up into the sunlight out of that vile place, if it were cleaned and fed and comforted, that would be a good thing, indeed; but if it were done, in that day and hour all the prosperity and beauty and delight of Omelas would wither and be destroyed. Those are the terms. To exchange all the goodness and grace of every life in Omelas for that single, small improvement: to throw away the happiness of thousands for the chance of happiness of one: that would be to let guilt within the walls indeed.

The terms are strict and absolute; there may not even be a kind word spoken to the child.

Often the young people go home in tears, or in a tearless rage, when they have seen the child and faced this terrible paradox. They may brood over it for weeks or years. But as time goes on they begin to realize that even if the child could be released, it would not get much good of its freedom: a little vague pleasure of warmth and food, no real doubt, but little more. It is too degraded and imbecile to know any real joy. It has been afraid too long ever to be free of fear. Its habits are too uncouth for it to respond to humane treatment. Indeed, after so long it would probably be wretched without walls about it to protect it, and darkness for its eyes, and its own excrement to sit in. Their tears at the bitter injustice dry when they begin to perceive the terrible justice of reality, and to accept it. Yet it is their tears and anger, the trying of their generosity and the acceptance of their helplessness, which are perhaps the true source of the splendor of their lives. Theirs is no vapid, irresponsible happiness. They know that they, like the child, are not free. They know compassion. It is the existence of the child, and their knowledge of its existence, that makes possible the nobility of their architecture, the poignancy of their music, the profundity of their science. It is because of the child that they are so gentle with children. They know that if the wretched one were not there sniveling in the dark, the other one, the flute-player, could make no joyful music as the young riders line up in their beauty for the race in the sunlight of the first morning of summer.

Now do you believe them? Are they not more credible? But there is one more thing to tell, and this is quite incredible.

At times one of the adolescent girls or boys who go see the child does not go home to weep or rage, does not, in fact, go home at all. Sometimes also a man or a woman much older falls silent for a day or two, then leaves home. These people go out into the street, and walk down the street alone. They keep walking, and walk straight out of the city of Omelas, through the beautiful gates. They keep walking across the farmlands of Omelas. Each one goes alone, youth or girl, man or woman.

Night falls; the traveler must pass down village streets, between the houses with yellow-lit windows, and on out into the darkness of the fields. Each alone, they go west or north, towards the mountains. They go on. They leave Omelas, they walk ahead into the darkness, and they do not come back. The place they go towards is a place even less imaginable to most of us than the city of happiness. I cannot describe it at all. It is possible that it does not exist. But they seem to know where they are going, the ones who walk away from Omelas.

In a world where ethical dilemmas are often diluted by complexity and compromise, Ursula K. Le Guin's "The Ones Who Walk Away from Omelas" presents a stark, unforgiving thought experiment. The story constructs a seemingly perfect utopia, the city of Omelas, whose joy and prosperity are explicitly founded upon the perpetual torment of a single, innocent child. By making the terms of this society so unambiguous, Le Guin strips away the mitigating factors of real-world injustice, forcing a direct confrontation with a core philosophical question. The citizens' varied responses—from anguished acceptance to silent departure - map the terrifying landscape of human morality under absolute conditions. Through the allegory of Omelas, Le Guin argues that a truly just and moral society cannot be founded upon the systematic suffering of the innocent; the most profound ethical act available to the individual, therefore, is not reform or revolution, but the refusal of complicity embodied by those who walk away. Ultimately, "The Ones Who Walk Away from Omelas" serves not as a blueprint for society, but as a stark litmus test for the individual conscience. By presenting a utopia with a clearly defined, horrifying price, Ursula K. Le Guin removes the ambiguity that often shields us from moral accountability. The citizens who stay demonstrate how easily justice can be rationalized away in the name of collective good, while those who walk away embody the only pure form of protest possible within such a system: the refusal to participate. Their quiet exodus into the unknown does not solve the problem of Omelas, but it permanently condemns it. In the end, the story suggests that true morality lies not in building a perfect society on a rotten foundation, but in having the courage to turn one's back on it—to choose the integrity of the lone, walking figure over the glittering, compromised comfort of the city. Le Guin leaves us with an unsettling certainty: in the face of foundational injustice, to walk away is the only act that keeps one's own humanity intact.

Ursula K. Le Guin's "The Ones Who Walk Away from Omelas" begins not with a plot, but with an invitation: "Perhaps it would be best if you imagined it as your own fancy bids." This narrative tactic is the key to the story's enduring power. By compelling the reader to co-create the dazzling utopia of Omelas - its festivals, technology, and pleasures - Le Guin masterfully implicates us in its subsequent moral catastrophe. The story is less a parable about a fictional city and more a mirror held up to the reader, designed to expose the uncomfortable foundations of our own moral reasoning and the stories we tell ourselves about happiness and cost. Le Guin employs a direct, participatory narrative voice and a deceptively simple allegorical structure not merely to describe a moral dilemma, but to actively induce it within the reader, transforming the story from a tale about ethical choice into an experience that reveals the reader's own capacity for complicity or integrity. In the final analysis, the true subject of Le Guin's story is not found in Omelas, but in the silent space between the text and the reader's own conscience. By masterfully employing a participatory narrative voice, Le Guin transforms a philosophical allegory into a deeply personal ethical encounter. We are made complicit in building the city's beauty only to be implicated in its hidden crime. The famous, ambiguous ending—the figures walking into the darkness—succeeds because it redirects the central question outward: the story is no longer about what they will do, but about what we will do now that we know. "The Ones Who Walk Away from Omelas" thus achieves a rare literary feat: it refuses to remain a closed fiction. It completes itself only in the reader's subsequent reflection, challenging us to identify the hidden "children" in our own world and to decide, in the quiet of our own minds,

whether we are among those who stay, rationalizing, or those who begin the difficult, necessary walk away.

The story is a philosophical fable that poses a profound moral question: Can a perfect, joyous society be justified if its existence depends on the intense, unjust suffering of a single, innocent being? Le Guin is constructing a genuinely attractive utopia, not a simplistic one. She preemptively argues against the cynical idea that happiness is stupid or boring. By making Omelas so appealing, she makes the coming moral dilemma much harder and more impactful. This is the story's central moral paradox. The child is a scapegoat or a necessary sacrifice. The "terms" of Omelas's social contract are made explicit: the collective good is built on extreme individual suffering. This forces the reader to confront utilitarian ethics ("the greatest good for the greatest number") in its most brutal form. This section explores moral complicity and cognitive dissonance. The citizens represent society's ability to accept systemic evil once it becomes normalized and is seen as essential for comfort. Their "mature" acceptance is a critique of how we often justify injustice for stability. Their compassion is real, but it is rendered passive. This is the story's crucial ethical counterpoint. Walking away is a non-violent, individual act of moral protest. They offer no alternative system, lead no revolution. Their choice is to withdraw their consent from a society they deem fundamentally unjust. Their destination is ambiguous because the story isn't about solutions; it's about the act of rejection itself. They represent integrity, the refusal to be complicit, even at the cost of paradise. The child symbolizes any marginalized, exploited, or sacrificed group whose suffering underpins a society's functioning (e.g., the poor, exploited labor, oppressed minorities). The story is a direct challenge to pure utilitarianism. Omelas is the ultimate utilitarian society. The ones who walk away are acting on a deontological principle: that some actions (torturing a child) are inherently wrong, regardless of the good consequences. Is happiness that is contingent on willful ignorance or injustice truly valuable? Le Guin argues through Omelas that happiness gains meaning and maturity from confronting suffering, yet she also condemns happiness bought at an unacceptable price. The walkers take personal responsibility for their ethics. Their choice is lonely, difficult, and directionless, but it is morally coherent.

Ursula K. Le Guin's "The Ones Who Walk Away from Omelas" is not merely a story to be analyzed; it is an experiential trap for the conscience. By first inviting the reader to co-imagine a dazzling, joyous utopia and then revealing that its existence depends on the brutal, solitary suffering of a child, Le Guin skillfully bypasses cerebral debate and strikes directly at the reader's gut-level moral intuition. The narrative forces a visceral choice between two irreconcilable ethical impulses: the pragmatic acceptance of a tragic bargain for the greater good, and the absolute refusal to participate in a system built on such a foundation. This clash of intuitions does more than define the citizens of Omelas; it holds up a mirror to the reader, exposing the often-unexamined principles upon which our own ethical judgments rest.

The story deliberately provokes two powerful, conflicting intuitions. The first is the utilitarian, pragmatic intuition to stay. This is the gut feeling that the horrific suffering of one child, while tragic, is a bearable price for the flourishing of thousands. It is an intuition of tragic necessity, appealing to our sense of realism, consequence, and tribal preservation. It whispers that

releasing the child would be a futile gesture that only destroys real, widespread goodness for a vague and uncertain gain. The opposing force is the deontological, absolutist intuition to walk away. This is the instinctive revulsion, the feeling that some actions are so fundamentally wrong that no amount of resulting happiness can justify them. It is an intuition of justice and integrity, screaming that complicity in such torture corrupts the soul, regardless of the benefits. This impulse values moral purity and the sacredness of the individual over any collective outcome.

Though both intuitions are rendered understandable, the intuition to walk away is more compelling because it is the only response that maintains a coherent link between moral feeling and moral action. Staying, even with grief, means accepting that ends justify means—a principle that, once validated, can be used to justify infinite horrors. The walkers' choice is compelling precisely because it offers no alternative plan, no reformed system. Its power lies in its silent, definitive no. It is an act of personal witness that says, "I will not be sustained by this." This intuition aligns with a foundational ethical belief: that human dignity is intrinsic, not contingent on utility. To walk away is to affirm that one's own humanity is incompatible with such a bargain, protecting an inner moral core that the citizens who stay have necessarily sacrificed. The walkers choose the integrity of their own conscience over the comfort of the community, a stance that feels tragically noble and authentically human.

The internal war between these intuitions reveals that the foundations of our ethics are more emotional than logical, built on empathy and a sense of fairness that predates philosophy. The story exposes how our moral reasoning often works backward: we have an intuitive, emotional reaction first (horror at the child), and then we employ logic either to justify acting on that impulse (walking away) or to rationalize suppressing it (staying for the greater good). The rationalizations of the citizens who stay—that the child is too broken to help, that it's too late—show how intuition can be dulled by comfort, habit, and social consensus. Thus, the story suggests that a healthy ethical foundation is one that remains sensitive to the raw, empathetic impulse toward the suffering individual, viewing it not as a weakness to be overcome by "mature" logic, but as the essential compass of a just life. The conflict proves that ethics, at its root, is about whose suffering we are willing to acknowledge and what we are willing to sacrifice for ourselves in response. In conclusion, Le Guin's story masterfully pits two core human intuitions against each other: the pragmatic drive for collective survival and the empathetic drive for absolute justice. While the choice to stay in Omelas represents a logical, if grim, social contract, the choice to walk away resonates as a more profound ethical imperative because it defends the inviolable principle that no society is truly good if its goodness requires evil. The unbearable tension between these options does more than define a fictional dilemma; it illuminates the architecture of our own morality. It shows that beneath layers of philosophy and social conditioning lies a basic, empathetic revulsion to innocent suffering. "The Ones Who Walk Away from Omelas" ultimately argues that the truest test of character may not be in building a perfect society, but in having the courage to leave an imperfect one behind, trusting the quiet pull of conscience over the deafening applause of a compromised utopia.
